

NJ K-12 Construction Management Specialists

NEW ROAD's professional staff has the experience and capability to provide expert representation for NJ K-12 clients.

NEW ROAD offers Clerk of the Works, Construction Management, Project Management and Program Management-level involvement. We serve as the owner's representative and liaison between the design team, contractors, engineers, government agencies and the school district. We are your project advocate!

NEW ROAD's construction managers work diligently to meet the owner's facility needs. Our emphasis on planning, hands-on project management and excellent communication with contractors and owners results in projects consistently completed safely, on-time and under budget.

Working closely with the district and the design team, we coordinate the goals and timeline of each project. We conduct regular job meetings, provide project updates, assist in building permits, and follow up on issues and details.

Our 35 years of experience enables us to identify, mitigate or avoid most project pitfalls. Once a potential issue is identified, we develop a plan of action, focusing on the details to carry it through to completion. We are proud of our record of quality projects completed on-time and under budget.

NEW ROAD IS "THE" NJ K-12 CM, and your professional advocate for capital projects. We consider it an honor to represent our clients and their best interest is our priority.

NEW ROAD provides part-time and full-time services and we tailor our services to meet the challenges of every project. We successfully manage all phases of projects, from referendum budgeting and planning, through design, construction and owner occupancy.

Point Pleasant Middle School
